1. Bulk consumers can take supply at 400V or at 11kV. 2. Council reserves the right to connect consumers with an estimated demand exceeding 50kVA as Bulk Consumers. 3. Consumers with expected demand exceeding 100kVA, but does not exceed 500kVA, can only be supplied at 400V with special permission of the Deputy Executive Manager: Electro Technical Service, whose decision will be based on the capacity of the 400V network. 4. Where the expected maximum demand of a consumer exceeds 500kVA, supply shall only be at 11kV. 5. However, measurement can be done on Low Tension where possible. 6. Maximum demand charge is only applicable during the Peak and Standard hours whereas Access charge is applicable to all periods. 7. Access charge is based on the highest of the notified demand or the highest maximum demand during previous 12 months unless adjusted as per rules above 8. The tariff has been developed to promote job creation in the industrial and commercial sector. 9. The tariff will not be applied automatically and each consumer shall submit a new application in order for the demand criteria to be verified. 10. Only consumers who maintain a 24 hour demand profile within 10% variances above and below the normal demand will qualify for the tariff.

Same as (a) and (b), except that a new agreement must be entered into which stipulates that a pre-paid meter is a pre-condition.		Free	Free				
<b>(c) NRS 069 NETWORK RECOVERY COST</b>							
A once-off network contribution for the electricity requested for subdivisions, new developers, consent users, scheme amendments or consumer upgrades (existing serviced erven where requested capacity is greater than the original designed or installed capacity). The after-diversified maximum demand (ADMD) for each erven is used in network designs for township development, scheme amendment and service connection upgrades.							
(a) The ADMD has been determined by STATS SA Census 2011 municipal report which may be used for the following types of residential installations:							
# Not subject to VAT							

ELECTRICITY SUPPLY					
		TARIFF INCL VAT (R)	TARIFF INCL VAT (R)	INCREASE / (DECREASE) %	
	1. Residential low income (flats or units) - 3kVA			2017 - 2018	2016 - 2017
	2. Residential medium or high income (flats or units) - 5kVA				
	3. Single residential low income (per erf) - 3kVA				
	4. Single residential medium or high income where the erf size is smaller than 500m <sup>2</sup> - 7kVA				
	5. Single residential medium or high income where the erf size is greater than 500m <sup>2</sup> - 9kVA				
	For very high residential three-phase connections or upgrade of existing single phase connection to three phase maybe assume that the ADMD for a three-phase connection is three (3) times that of a single phase connection.				
	(b) The after-diversified maximum demand (ADMD) or notified maximum demand (NMD) per erf for commercial and all non residential applications requested in writing by the owner or developer shall be calculated prior to the NMD as indicated on the application by the owner or developer with the approval from the Manager: Electro-Technical Engineer (Planning, Construction and Design). The NMD's of existing serviced erven are equal to the installed capacity or as per service agreement.				
	<b>(c) Determining charges</b> The NRS069 network recovery cost is determined by the actual level at which the development connects to the supply system. The charge is calculated as follows:				
	R = Total network recovery cost payable in rand value ADMD1 = Sum of new ADMD in kVA ADMD2 = Sum of existing ADMD in kVA NRC = Network recovery cost per level as indicated below <b>R = (ADMD1 - ADMD2) X NRC</b>				
	<b>(d) Network contributions</b>				
	The "network recovery cost" charges must be as such to cover the capital liabilities incurred or to or be incurred by the municipality in supplying the distribution and or increase the capacity to the premises or group of premises. The contributions per kVA at the different connection levels are as follows:

4.3	That an application for GAP housing be accompanied by a signed affidavit that states the purchase price, or market value, reflected is the full purchase amount, or market value, and that, in the instance of a purchase price being given, that no additional amount is payable by the purchaser to the seller at any stage that can in any way be interpreted to be part of the purchase price of the erf or dwelling unit.			
4.4	That the Municipality may request information or proof or motivation from a developer/seller/buyer as to how the selling price or market value was determined. The municipality may request a formal valuation from a recognized property valuer, at the cost of the applicant			
<b>5</b>	<b>The following conditions will apply:</b>			
5.1	The tariff will apply for private residential flats, group housing development and any subdivisions or densification that places an additional burden on the services.			
5.2	The Bulk Service Levy excludes the cost of any link services for a development or densification. The developer/ owner is responsible for the total cost of any link services for the specific development.			
5.3	If the developer is required to construct bulk infrastructure, the cost thereof can be offset against the Bulk Service Levy payable.			
5.4	Developers be requested to provide bridging finance if council's funding are insufficient. The developers be refunded via methods acceptable to the Executive Director: Finance eg.: - Payment from the Bulk Infrastructure Fund (contributions from other developers) - The developer be credited with an equivalent erven Bulk Service Levy contribution for a future development. - Reduction on property tax payable			
5.5	The Bulk Infrastructure Fund be used for the upgrading of bulk services linked to development and that the approval of ad hoc applications for bridging finance from this Fund be delegated to the Executive Director: Finance on recommendation of the Executive Manager: Infrastructure Services, subject to official budget adjustment.			
5.6	Due date for BICL's payment: - Subdivision applications - on the date the transfer of erven are required - Any other application - on the date the building plans are approved - as per service level agreement if bulk service upgrading is required.			
5.7	The above tariffs will be applied in terms of municipal policy, which may be amended from time to time, as well as general notes attached to any Water and Sewer System Analysis report by Council's Master Planning consultant			

## **DEVELOPMENT CONTRIBUTION SUMMARY**

All Land Use applications submitted to the Municipality for approval from 1 February 2016 will be liable to pay a Developers Contribution as per Drakensteins' by-law on Municipal Land Use Planning of 2015.

1. A Development Contribution is a once-off charge imposed by the Municipality on a developer as a condition of approval of a land development application in order to cover the cost of the bulk engineering services required as a result of an intensification of land use.
2. Development Contributions are payable on the following services:
  - Water
  - Sewer
  - Roads
  - Stormwater
  - Solid Waste
3. Electricity Services has to abide to the NRS 069: Code of Practice for the Recovery of Capital Costs for Distribution Network Assets.
4. Development Contributions are applicable to all types of developments. (Low Cost Housing, GAP Housing, High Income Housing, Commercial, Retail, Educational, etc.)
5. Development Contributions are calculated using the approved calculator using unit cost per service as the basis of the formulae. The unit cost are derived from:
  - Replacement value of the service
  - Grants for new infrastructure
  - Outstanding loans for infrastructure
  - Existing consumption
  - Future consumption
6. Any subsidies and exemptions will be dealt with in accordance to an approved Policy.
7. Escalation will be done annually as per Construction Price Adjustment Formula(CPAF) per calendar year or when a Master Plan has been updated.
